WHAT FIVE YEARS HAVE DONE.

Remarkable Growth of One of the Local Industries.

PURE WATER CO. (INC.) HAS THE MOST SCIENTIFIC PROCESS OF DISTILLATION KNOWN.

At the junction of the Santa Fe and Southern Pacific Railroad, on the corner of Avenue, near Station, there is a new building, which has already assumed considerable proportions and promises to be one of the leading manufacturing enterprises of this country.

The industry in question is the one of bottling and distilling pure water. Pure Water Company, which occupies an elegant new building on the corner of Avenue and N. T. Williams, recently expressed for the industry.

Less than five years ago, Mr. H. H. Leland, the manager, began distilling water in a very modest way in his private residence in Berkeley, using only a hand-cart for delivery purposes.

The cause for such an unprecedented growth of an institution of this nature is easily explained when the policy of the company and rules observed in manufacturing are known.

Much has been written of late concerning the necessity of pure drinking water, and the public is eager to put the stamp of approval upon an institution that has a reputation for purity.

The spread of epidemics in this country is due to a large extent to the lack of pure drinking water. The public is well aware of the fact that the process of distillation of water is not a new one, but the fact is that the Pure Water Company has in its possession the most scientific process of distillation known.

The system employed by the Pure Water Company is the result of a series of practical experiments and improvements in the process which the most scientific minds could devise.

Our general manager, Mr. Leland, has been following the policy of the pure water company for the past year, and has been able to place the pure water company in the position of a leading manufacturer of pure water in this country.

The first step in the process of distillation is the purification of the water. This is done by passing the water through a series of filters, which remove all impurities.

The second step is the distillation of the water. This is done by heating the water to a temperature of 212 degrees, and the steam is then condensed and collected in a separate tank.

The third step is the bottling of the water. This is done by filling the water into bottles, which are then sealed and labeled.

The fourth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

The fifth step is the collection of the water. This is done by using a hand-cart to collect the water from the customer's door.

The sixth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

The seventh step is the collection of the water. This is done by using a hand-cart to collect the water from the customer's door.

The eighth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

The ninth step is the collection of the water. This is done by using a hand-cart to collect the water from the customer's door.

The tenth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

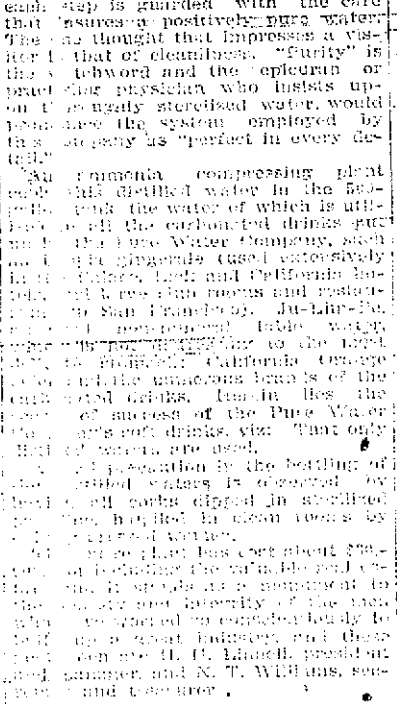

The eleventh step is the collection of the water. This is done by using a hand-cart to collect the water from the customer's door.

The twelfth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

The thirteenth step is the collection of the water. This is done by using a hand-cart to collect the water from the customer's door.

The fourteenth step is the delivery of the water. This is done by using a hand-cart to deliver the water to the customer's door.

NEWS FROM CITY OF ALAMEDA

MUST GO EASY FISCAL YEAR IS BENEFIT SOCIAL AFFAIR.

ON LIGHT.

BIG ENGINE AT MUNICIPAL PLANT SHUT DOWN FOR REPAIRS.

ALAMEDA, June 30.—The big engine at the municipal electric light plant was stopped last night to make a few necessary repairs. It was at first thought that the work would only require two days' time, but investigation has shown that the machinery is in such a condition that the work will not be finished until the last of the week.

The consumers throughout the city have been notified by the department to be very sparing in the use of light energy while it is not practical. The small engine is unable to do all the work at present required of it.

The new \$550 Pacific heater was installed in the plant today. The furnace was to have been installed last Saturday, but owing to some delay in the arrival of materials, the work had to be postponed until today.

COSTS PAID AND CASE DISMISSED.

ALAMEDA, June 30.—The case against Mrs. Mary Vaccarazza, charged with disturbing the peace of Mrs. Sedgely, her sister-in-law, was dismissed in Justice Cene's court yesterday. The complainant said she did not care to prosecute the defendant, so the latter was dismissed on the payment of the costs, which amounted to \$10.

TO BUILD APARTMENT HOUSE.

ALAMEDA, June 30.—A large apartment house is soon to be built on Santa Clara avenue. E. Belle-Oudry, the Oakland photographer, has prepared plans for a two-story structure of the Moorish style of architecture. In the center of the building will be a large court, enclosed in glass. Here will be located an attractive garden and fountain. The house will be a very handsome one, and strictly modern in every detail.

EXPERIMENTING WITH OIL.

ALAMEDA, June 30.—Street Superintendent Frodden has been experimenting with crude oil as a dust-layer for the city's streets. He has had a water-carried asphalt 23 barrels of the petroleum on Pearl street, from San Jose avenue to the bay.

STOLEN BOOKS ARE RECOVERED.

ALAMEDA, June 30.—The police have found the books stolen from Mrs. M. B. Stevens, of Central avenue. Detective Brown located the stolen property in a Park-street book store, where they had been sold for \$150. Last week two young men rented a room in Mrs. Stevens' house, and one morning, after they had gone out, she noticed that a number of her school books had disappeared. When the men returned at night, she accused them of taking the books. They indignantly denied her assertion. She then packed up their belongings and less than a week later they were recovered by the police department.

RING IS RETURNED TO OWNER.

ALAMEDA, June 30.—Chief of Police Conrad has sent to Miss Ann Cotton, of Liverpool, England, now in British Columbia, the ring stolen from her by an expressman a few weeks ago. The ring, which was a valuable diamond, was taken from her room the day she left Alameda for Canada. When she heard that the ring had been found, she wrote to Chief Conrad, asking him to forward the diamond, which was done yesterday. Miss Cotton stated that she would not return to Alameda to receive the ring, so he was allowed to go free.

WAGON DAMAGED IN RUNAWAY.

ALAMEDA, June 30.—A horse belonging to the New Alameda Market, ran away on Park street yesterday afternoon, turning down Lincoln avenue, then along Broadway. The damage to the wagon was slight.

CHIEF MAKES APPOINTMENTS.

ALAMEDA, June 30.—Chief Fred Krauth of the Fire Department has temporarily appointed James Delvecchio, first extra driver, to succeed Jack Inley, who resigned last week. Second extra driver, Andrew Nissen, will take Delvecchio's place, and P. W. Hartley succeeds Nissen. This will leave one vacancy to be filled at the bottom of the ladder. The chief's appointments next Monday evening, as they are all in the regular line of advancement.

FARRELL CASE IS DISMISSED.

ALAMEDA, June 30.—The case against Stephen Farrell, charged with disturbing the peace of Arthur Steinblit, has been dismissed in the Recorder's Court. Judge Pappan stated that he would not have issued the warrant had he known the true condition of affairs.

PARSON TAKES HIS VACATION.

ALAMEDA, June 30.—Rev. William N. Guthrie, rector of Christ's Episcopal Church, left yesterday to spend a two-months' vacation at Colorado Springs. During his absence, his pulpit will be filled by the Rev. Louis Dun, a well known Eastern divine. Mr. Guthrie will return September 6th. On that date, Archbishop Emery will deliver an address on "The Missions in and About San Francisco."

VARIOUS DEPARTMENTS MUST MAKE THEIR REPORTS FOR YEAR TONIGHT.

ALAMEDA, June 30.—Today marks the close of the fiscal year in Alameda. All the various heads of departments, as fire, electric, library, board of education, public works, etc., are expected to have ready their annual reports, which will be presented to the Board of Trustees at the Monday evening meeting.

The report of Chief Fred Krauth, of the fire department, shows that there has been a total of 34 fire alarms during the year. This is the largest number of fires in the history of the department, extending over 10 years or more.

The reports of George Mastick, chairman of the Board of Education, and the various school trustees, will also be ready for presentation.

It is expected that the report of the electric light department will be quite interesting as it will embody the recent investigation of ex-manager Thompson's books.

The police department is the only one whose year does not end at midnight tonight. Its year is the same as the calendar year.

WANTS RAILROADS ASSESSED.

C. S. MACMULLEN SENDS A COMMUNICATION TO THE COUNCIL.

At the meeting of the City Council last night the following communication was received and placed on file:

"To the Council of the City of Alameda:—Your honorable body is desirous of increasing the city's liability to increase its revenue from property taxation. It will not be amiss for you to petition the State Board of Equalization that it assess railroad property honestly, and the Governor of the State that he see that such property is so assessed."

"In explanation: The State constitution provides that said Board shall assess the franchise, roadway, right-of-way, and all rolling stock of all railroads operated in more than one county of the State at their actual value, and that the same be apportioned to the counties, cities, etc., in which such railroads are located in proportion to the number of miles of railway laid in such counties, cities, etc. In these particular cases, the State Board disregards the contribution made by the Pacific and other railroads, which also assesses the Board's dereliction of duty, and your local city assessor's annual written communication to the Board, which shows that each year taxes on but eighteen miles of railway instead of taxes on fifty miles of railway operated within the city limits."

"The State Board assesses to the Southern Pacific and one third between Emeryville and Seventh street; fixes the rate's terminal at Seventh and Bay streets, and the terminal of the 'Berkeley Branch' at Sixth Street."

"It assesses the Central Pacific Company for one track only on the western line through Seventh street to Fruitvale, and for one track only on First street, and out of the network of tracks in the West Oakland yards it assesses but a single mile—the 1200 feet of track running from First street to Harrison street bridge is assessed as 650 feet."

"But one track is assessed to the South Pacific Coast Railway Company and the right of way in this city is out from and into the city for 1500 feet."

"Poor's Railway Manual gives the Central Pacific Company's assets as over \$20,000,000 and the State Board says the value of the franchise, roadway, etc., in this State is \$15,000,000. The company has an excess of 1000 miles of railway in this State of which only 745 miles are assessed."

"The State Board's valuation of the Central Pacific (\$15,000,000) is but 67 per cent of Assessor Dodge's assessed valuation of the market street station of street railroad in San Francisco."

"I suggest that you have the city engineer report the number of miles of railroad in this city, and that, thereupon, the city assessor be directed to apply the railroad assessments to this city."

MEETING NIGHT CHANGED.

ALAMEDA, June 30.—The Board of Health will meet tomorrow evening instead of on next Tuesday, the regular meeting night. This change is made to accommodate a number of the members who wish to leave town before next week.

WILL BE READY AUGUST 1.

ALAMEDA, June 30.—City Assessor E. M. Smith says that the assessment rolls for the coming fiscal year, upon which he is now working, will be ready about the 1st of August. The City Trustees meet as a Board of Equalization on the second Monday in August, the 19th instant.

ENTERTAINMENT AND BALL FOR HEBREW LADIES' CHARITY FUND.

ALAMEDA, June 30.—An entertainment and ball for the benefit of the Hebrew Ladies' Endeavor Society Charity Fund will be given in Lincoln Hall, Bay station, this evening. Talent for the occasion has been secured from San Francisco and Oakland, and an excellent program will be furnished. Seats for the dance and entertainment have been disposed of and a large attendance is insured.

On the reception committee are the following: Mrs. M. G. Miller, Mrs. G. Miller, Mrs. J. Miller, Mrs. K. Miller, Mrs. L. Miller, Mrs. M. Miller, Mrs. N. Miller, Mrs. O. Miller, Mrs. P. Miller, Mrs. Q. Miller, Mrs. R. Miller, Mrs. S. Miller, Mrs. T. Miller, Mrs. U. Miller, Mrs. V. Miller, Mrs. W. Miller, Mrs. X. Miller, Mrs. Y. Miller, Mrs. Z. Miller.

VISIT DRAWING TO AN END.

AMERICAN OFFICERS ATTEND SERIES OF RECEPTIONS BEFORE LEAVING.

KIEL, June 30.—The visit of the United States European squadron to Kiel is drawing to an end. The last salute of the Imperial standard was fired as the Hohenzollern sailed for Eckernförde this morning to accommodate the Emperor and Empress there tonight, after the finish of the cruiser-yacht race.

The Emperor started for Eckernförde on board the Meteor at 7 a. m. The Empress was on the Iduna, which also started for Eckernförde.

The American naval officers will attend a series of receptions on board the German warships this afternoon.

The fourteen-oar cutter of the German fleet ship Kaiser Wilhelm II beat the Chicago's twelve-oar cutter today in a race over a two-mile course, covering the distance in 23 seconds better time. The winning German cutter, on account of having an extra pair, started 12 seconds after the Chicago's boat and finished eight seconds ahead.

The Kaiser Wilhelm II is the champion of the German squadron and won a cup from twelve other German fourteen-oar cutters yesterday. The crew, which was in excellent training, challenged the boat of the American squadron, which was the Chicago's, to a race over a two-mile course. The German boat won the race by a margin of 12 seconds.

The hay bams are practically empty. Last year's crop of what an Indian would call "roughness" having been pretty thoroughly disposed of. New crops are beginning to move in this direction in very large quantities, although enough is arriving to supply immediate pressing demands. The new crop is of good quality and commands good prices. It is quoted today as follows: Wheat, \$1.15 to \$1.20; corn, \$1.10 to \$1.15; alfalfa, \$1.10 to \$1.15; burr clover, mixed, \$1.10 to \$1.15; barley, \$1.10 to \$1.15.

PRISONER MAKES HIS ESCAPE.

FRANK WILLIAMS FINDS HIS KEY AND LEAVES THE CITY.

Frank C. Williams, alias Frank Rich, who was serving a sentence of five months in the City Prison for misdemeanor, escaped from custody shortly before midnight this morning. He was found by a patrolman in the jail and which had been left about the prison by one of the off-late. Williams was a "trustee" and was alluded to by the prison guard.

The escape was not known to the authorities until Williams had nearly as long as he could. Detectives were immediately detailed to hunt for the fugitive and Chief Hodgkins made every effort to prevent him from leaving town but without avail, and it is believed that Williams has come to San Francisco.

Williams probably found the key to the rear door which had been lost by a prison guard and which until now had been kept in a key ring. Williams is a "trustee" and was alluded to by the prison guard.

NEWS OF WATER FRONT.

EMERYVILLE PASSENGER WHARF IS RECEIVING THE LAST OF ITS RAILS.

This week opened very quietly along the water front, yet there is "something doing" and promise of a fairly busy week for this season of the year. Business in this section of the city, like that in all other portions, is responsive to the depression of vacation time, and the warmer days now furnished by the clerk of the weather make those who are tied down by the demands of business long for cool streams and shady forest, for mountain retreats, and the dolce far niente of a life alone with nature.

SUNSHINE INSTEAD OF COAL.

Investigation shows that coal stocks are light, and but comparatively little doing. Old Sol furnishes the major portion of the heat now necessary for household comfort—in fact, rather over does the thing—and gas and oil meet the requirements for the culinary departments. Hence coal is not the necessity it will be when cooler breezes blow. The strike in the Wellington mines is still unsettled and the mines are in bad condition. Even should a harmonious agreement be reached at once it would be some time before work could be resumed under normal conditions, owing to the immense amount of pumping that will have to be done to free the mines of accumulated waters.

READY FOR NEW CROP.

The hay bams are practically empty. Last year's crop of what an Indian would call "roughness" having been pretty thoroughly disposed of. New crops are beginning to move in this direction in very large quantities, although enough is arriving to supply immediate pressing demands. The new crop is of good quality and commands good prices. It is quoted today as follows: Wheat, \$1.15 to \$1.20; corn, \$1.10 to \$1.15; alfalfa, \$1.10 to \$1.15; burr clover, mixed, \$1.10 to \$1.15; barley, \$1.10 to \$1.15.

MAKING SHIP SHAPE.

At the City Wharf, the four-masted schooner A. B. Johnson, Sieghart master, is unloading lumber from Gray's dock and making minor repairs to deck and keel. The steamer Gypsy, Lehard master, is unloading Santa Cruz lime at the same wharf.

At Adams Wharf the steamer Mandala, Smith master, is unloading lumber and small timber from Gray's dock and making minor repairs to deck and keel. The steamer Gypsy, Lehard master, is unloading Santa Cruz lime at the same wharf.

The schooner North Star, Jackson master, is also discharging lumber from South End, Washington, at Adams Wharf.

The schooner Sophie E. has just above the railroad bridge discharging a cargo of barley.

Except as above noted, the harbor is clear of employed shipping this morning.

The ferry steamers San Jose and Alameda, though practically completed, will have their noses buried in the creek mud waiting for the completion of the rail line with which they are to connect, and will not be put into commission until that work has been finished.

SHIP YARDS QUIET.

At the various shipyards, business is very quiet. The only work being done is the scaling of prices adopted by the union in dividing the work away from Oakland and to northern yards. A portion of the labor on vessels under construction has heretofore been done by a class of workmen called "scalers." It is stated that the union also expects to eliminate this class by performing the labor heretofore performed by them to be done by regular ship carpenters, and that this ruling works a hardship upon the builder in that it causes work to be done elsewhere that should be performed here.

OIL TO LAY DUST.

Two good coats of oil have been put on the Murray Gauge track from the switch west of the bridge to the Mole, and the oil has taken proper hold or the soil, with the result that dust has become a thing of the past along this line and travel rendered a pleasure both to the commuter and the occasional.

REMOVE PIPE LINE.

The Standard Oil Company having removed its works from that vicinity, a force of men from the United Engineering Works was this morning engaged in tearing out the old pipe line at the west end of the railroad bridge. Tearing out the line proved to be an easier job than it was to prevent the work with which the pipes were filled from flowing into the waters of the creek. However, careful management, coupled with a mandatory order from the City Fathers prevented even this.

REPAIRING WHARF.

Repairs, much needed, are being made to the bay wharf at the foot of Grove street. New planking is being substituted for the old and decayed material which has rendered this wharf treacherously unsafe for some time.

GRADING THE STREET.

Grading and macadamizing of the four blocks west of Washington, on Tenth street, is progressing rapidly, and this section will soon compare favorably with any other in the city. The work has been long delayed, but "better late than never" applies here in full force. The portion being done by private ownership is well along toward completion, two blocks being ready for the second coat of macadam. The city top dressing of gravel, and the railroad company is making noticeable progress with the part belonging to it to complete.

WHARF NEARLY COMPLETE.

This afternoon the two last cars of railroad iron needed to complete the Emeryville Wharf were taken over to that bustling and growing little city from the stock piled up near the foot of Broadway, and a day or two more ought to see that track ready for the rolling stock.

WILLIAM BARNES' RECORD. The authorities at Napa, with whom Chief of Police Hodgkins has been in communication, stated in a letter to the Chief this morning that William Barnes, who is at present in the City Prison awaiting trial for grand larceny, served 150 days in the Napa jail for obtaining money by false pretenses. He was convicted of passing a bogus check. Barnes is accused of having stolen \$36 in gold from Mrs. Annie Hughes of 1110 Jefferson street, while boarding with her.

PLEASURE AND FRATERNITY RULE AT FAIR.

Days and Nights Given Over to the Innocent Pleasures of Both the Young and the Old.

At the grounds of the Oakland Street Fair this afternoon there were several thousand children who had gathered there to enjoy the beauty of the scene and the amusements afforded by the various booths and side shows, and nearly all of them had traveled all the way from San Francisco.

Many of them were accompanied by their parents, and the whole-hearted manner in which they revelled on the grounds in the warm sunshine was alone worth the price of admission to an adult. The children from the other side of the bay were admitted free and this accommodation will be extended to them tomorrow again. The presence of so many young people and their parents is a tribute to the excellence of the entertainment when contrasted with the means of amusement which are usually provided by the metropolis.

LAST NIGHT.

Last night the second week of the fair opened in a most encouraging manner, despite the fact there was a slight chill in the atmosphere which was not experienced on preceding evenings. Inside the grounds, however, the excitement and gai

the Department of Pathology at the University of California. Under the direction of Professor Merriam who has himself actively engaged in the work, the first series of lectures on the subject of venereal fever is now made to deliver some 400 double tickets, the fame of which has spread over the entire scientific world. In tonight's lecture which is for the benefit of the students attending the summer session, and of the student body of the University of South East, Professor Merriam will tell of the work of vaccination and of its significance in the field of science.

TO HELP IMMIGRANTS.

CHICAGO, June 30.—Steps toward the formation of an international emigration society were taken last night at a meeting called by Dr. A. R. Le Douarin. Resolutions were adopted favoring the formation of such a society for the purpose of bettering the condition of men by giving him an opportunity to get away from the cities. The immediate cause for the meeting was to make some arrangements for the emigration of a large number of immigrants who are expected to pour into the country on account of the Kluskin massacres. Dr. Le Douarin is to interest the rich men and have them advance the necessary money to send the emigrants on farms. Speeches were made by Jacob Labosky, Roman Lewis, F. W. Monroe, Henry Schuchel, E. P. Grosenthal and Professor A. L. Griffiths.

THE GOLDEN CAT BUDGET.

SURPRISE PARTY—OLD RESIDENT DEAD.

GOLDEN GATE, June 31.—Miss E. Hunt arrived home from Boston on Saturday. She has been in attendance at the Conservatory of Music for the past year.

SURPRISE PARTY.

Saturday evening Misses Lora Kinkaid, Marie Kinkaid, Elma Kinkaid, M. Williams, Ellen Williams and Mrs. V. Hays gave a surprise party to Arthur Williams, who resides on Filbert street, between San Pablo and Park. Mr. Williams goes to Massachusetts weekly and as a surprise affair was in every way a success.

NOT SERIOUSLY HURT.

Mrs. Elma Thibault, who rode wheel into an open ditch a few days ago, is recovering from the shock and will probably come back bruised all over, which are not serious, was injured. However, she does not care repeat the experience.

FROM BAKERSFIELD.

Mrs. Frank and family, of Bakersfield, have moved into Mrs. Goodrich's for the summer, at least. The children of Golden Gate are very preferable to the tropical heat of Bakersfield during the summer months.

RETURNED HOME.

Yesterday Mr. and Mrs. C. H. Ne returned from San Jose, where they had been visiting friends.

THE FUND SUMMONS.

Mr. Paul Johnston, of two fifty-five-cent fund and bond residents of Golden Gate, named by the board of directors, and paid \$100, a sufficient number of signatures and returned one hundred and twenty-one cents with a check drawn on the City of San Francisco. The others are living here.

The fund has had reached the age of six years, and it is thought when the fund reaches thirty the welfare of Maine, ending there to proceed, and twenty-one cents are removed from San Francisco to Golden Gate, where he has no residence, debt and receiving the report and so of all who know him. Federal services will be held at 2 p.m., Wednesday the late residents of Oregon.

WANT THEIR MONEY.

HAVANA, June 30.—The radical of the Revolutionary Veterans Association appointed Congress or the immediate appointment of a Congressional committee to pass upon the validity of soldiers' claims. They ask that 25 cent thereof be paid out of the government's treasury. Some of the radical veterans denounce the government because the payments were delayed.
